- SCAG reserves the right to disqualify any and all proposals that are not submitted in accordance with the required format described in this RFP.
- Proposals must include a line item budget in the format and detail shown in Attachment 5. A similar detailed budget is required of each subcontractor whose portion of the work is \$25,000 or more.

- Any proposal exceeding the budget specified in this RFP will not be accepted.
- Funding for this project is contingent upon availability of funds at the time of contract award. SCAG's Fiscal Year is from July 1 through June 30.
- SCAG does not reimburse respondents for the cost of proposal preparation, even in the event of RFP cancellation.

This requirement also applies to any proposed subcontractors whose portion of the overall work is valued at \$25,000 or more.

- Disadvantaged Business Enterprises (DBEs), as defined in Title 49, Part 26 of the Code of Federal Regulations, are strongly encouraged to apply.

The Certificate of Insurance must be provided by the successful offeror prior to contract award.
- If applicable, SCAG prefers that software developed, under SCAG's contract, not incorporate proprietary and/or third party software components. This does not preclude the development of deliverables that interface with commonly available off-the-shelf software. However, contractors must determine in

advance whether SCAG already has, or is willing to procure, appropriate licenses for any proprietary and/or third party software that would be required. Impacts of enhancements and upgrades must also be provided. SCAG will require delivery of documentation and source code for all electronic intellectual property developed under a SCAG contract prior to releasing final payment to the contractor.

SCOPE OF WORK

FINAL AVIATION IMPLEMENTATION PLAN

RFP No. 05-026

SCOPE OF WORK (TECHNICAL APPROACH)

***Statement of objectives**

The object of the project is to develop strategies for accomplishing the essential steps needed to carry out the Preferred Aviation Plan. A key concern is that elected officials and stakeholders clearly understand the importance of a MAGLEV transportation system to the implementation of the Preferred Aviation Plan, which calls for decentralized airports in the region. Another concern is that elected officials and stakeholders believe that their input will, in fact, be used in the final implementation strategies.

***Outline of Scope of Work**

Task 1 would require scheduling meetings with key elected officials and stakeholders in the region to receive their input and to discuss strategies to implement the Preferred Aviation Plan.

At these meetings, input from elected officials and stakeholders including outreach/meetings with air quality districts at local, state and federal level would be sought on a number of aspects:

- **Market incentives** to support decentralized airports by airlines and their passengers
- **Concept and benefits of a MAGLEV** high-speed rail system to move passengers and freight to regional airports
- **Airport Consortium Organization** to coordinate the decentralized airports with Los Angeles World Airport Authority and other airports in the region
- **Airport Finance** for construction improvement at these airports

- **Local Match** for federal/state grants
- **Legislation** to make possible the implementation of the Preferred Regional Airport Plan with Maglev ground access

Task 2 would require moderating meetings involving SCAG staff and key stakeholders to provide the most effective and progressive agreement on issues of discussion.

Task 3 would require participation and involvement in Maglev Task Force meetings including attendance, periodic updates and input on items of discussion.

After each meeting a short memo would be prepared, summarizing the issues discussed and results of the meeting. At the conclusion of all the meetings of elected officials and stakeholders, the common issues raised would be detailed and any consensus and/or opposition would be noted in a Final Technical Memorandum. Also, any issues that need further exploration would be noted in the Final Technical Memorandum.

***Additional Notes**

Meetings with key elected officials and stakeholders should be scheduled in a timely manner, which may necessitate personal phone calls and/or other means of contact to follow-up on the initial meeting request letter.

***Schedule for completion of work**

Within *two weeks* of Notice to Proceed: Develop informational material with SCAG staff for subsequent presentation

Within *eight weeks* of Notice to Proceed: Meetings with Los Angeles City and County elected officials, stakeholders and staff. Additional meetings with other stakeholders may be held as necessary.

Within *twelve weeks* of Notice to Proceed: Meetings with San Bernardino and Riverside City and County elected officials, stakeholders and staff. Additional meetings with other stakeholders may be held as necessary.

Within *thirteen weeks* of Notice to Proceed: Meetings with Los Angeles World Airport (LAWA) staff and stakeholders. Additional meetings with other stakeholders may be held as necessary.

Within *sixteen weeks* of Notice to Proceed: Meetings with Los Angeles City and County, Orange County City and County, San Bernardino and Riverside City and County elected officials, stakeholders and staff, as needed.

Within *twenty-four weeks* of Notice to Proceed: Meetings with LAWA and other selected elected officials and stakeholders for follow-up and finalization of issues and prepare Final Technical Memorandum

***Anticipated effectiveness of approach**

It is expected that the above approach will meet and possibly exceed stated objectives and time frames.

Deliverable: Final Technical Memorandum

End of Contract: June 30, 2005

Not to Exceed Amount of Contract: \$20,000

CONTRACT BUDGET EXPLANATORY INFORMATION

RFP No. 05-026

The sample line item budget on the following page reflects the most common format used to present budget or compensation information in contracts for planning services. Under this format, the consultant is compensated for its costs, plus given a fixed fee. All consultant (and subcontractor) costs must be allowable and consistent with Federal cost principles (see term VII, paragraph F of the MPO/Consultant Contract Boilerplate). Please be aware that the cost-plus-a-percentage-of-cost bid method, where the consultant's profit is a percentage of the reimbursed costs on a project, is not allowed under Federal rules.

In reviewing the sample line item budget, the following should be considered:

- Under direct labor, it is preferable to identify professional staff by both name and position. Such a format ties the level of effort to the staff actually responsible for the project.
- Direct labor and fringe benefits must be shown as separate dollar amounts.
- There are no provisions in the contract budget for contingency fees.
- The salary rate quoted should be the highest rate of compensation the staffer/position is expected to receive during the life of the contract. Expected merit or cost-of-living increases should be incorporated into the quoted rate.

All consultants must prepare and submit a line item budget using the exact format shown on the following page, or may risk having their proposal disqualified. Furthermore, any subcontractor whose portion of the work is \$25,000 or more must also prepare and submit their own line item budget as part of the proposal.

A number of these metadata fields require prior consideration between SCAG and contractors before data acquisition or collection begins. These are:

1.4.1 Progress

SCAG requires that a contractor indicate the anticipated progress of all datasets upon project completion. Explanations should be prepared for any datasets that are not complete at the close of the contract.

1.7 Access Constraints

Any anticipated constraints on access to datasets need to be documented and agreed to by SCAG before data collection or acquisition begins. Any licensing requirements should be spelled out here.

1.8 Use Constraints

Any anticipated constraints on use of data sets need to be documented and agreed to by SCAG before data collection or acquisition begins. Any licensing requirements should be spelled out here.

1.12.2 Security Classification

Any anticipated sensitivities of the data set or security implications of the dataset need to be documented and agreed to by SCAG before data collection or acquisition begins. This applies to general sensitivity issues and not strictly national security classification systems. For example, SCAG needs to know that the data being collected is sensitive to the extent that it should not be displayed at large scales on the Internet.

1.13 Native Data Set Environment

The data set format needs to be documented and agreed to by SCAG before data collection or acquisition begins. SCAG works primarily with standard ESRI formats like shapes and coverages.

2.1.2.1 Attribute Accuracy Value

The accuracy of attributes needs to be documented and agreed to by SCAG before data collection or acquisition begins. For example, if elevations are being collected SCAG needs to be informed that they will be plus or minus 50 feet.

2.4.1.2.1 Horizontal Positional Accuracy Value

The horizontal positional accuracy needs to be documented and agreed to by SCAG before data collection or acquisition begins. For example, if point locations are being recorded from a GPS receiver, SCAG needs to be aware that 90% of the points are within 30 meters of true ground position.

2.5.1.4.1 Source Currentness Reference

SCAG needs to be informed if the currentness reference is not ground condition. The currentness reference is the bases on which the time period content is determined. The date of the data set can be based on a number of things like publication date, release date, or delivery date. An example would be the 2000 Thomas Brothers centerline file. The date usually associated with this file is the year indicated on the “Thomas Guide” that the digital data was used to create. It is much more likely that the data actually represents some time in 1999, since the books came out in time for Christmas 1999. The currentness reference in this case could be Thomas Guide title date.

4.1 Horizontal Coordinate System Definition

SCAG needs to know and agree to the data projection. It would be very unusual to accept a projection that does not have standard parameters. Data will most often be required in North American Datum 1983 UTM zone 11. The parameters for this projection are:

Projection: Transverse Mercator

Parameters

False Easting 500000.0000000

False Northing: 0.0000000

SCAG also requires all codes used in any spatial data set to be provided in an agreed upon electronic format.

The FGDC standard for data documentation is a very complete standard covering every kind of spatial data. What follows are the items for metadata documentation in datasets typically received at SCAG. Generally SCAG receives data pertaining to phenomena on the earth's surface in a vector form of points, lines, or polygons. Other types of data, which might include such forms as raster data and imagery data or some theme as subsurface water depth, would require reconsideration of some of the specific items required. Generally the types of metadata information outlined at the first and second levels below are required of all data.

The outline numbers are from FGDC-STD-001-1998 "Content Standard for Digital Geospatial Metadata". The actual fields that require in input are underlined

Web Policies and Guidelines for Consultants

1. Tools and Requirements

Web staff uses these tools and applications for development and maintenance of SCAG's site:

- Macromedia Dreamweaver 4+ or Dreamweaver Ultradev 4
- Adobe Photoshop6+
- JavaScript
- ColdFusion 5 (used for developing database-driven Web sites or applications)
- ASP
- Perl
- Cascading style sheets
- SCAG uses IIS4.0

2. Web Development Process

Document preparation:

- All documents should be converted to PDF and forwarded electronically to the Web staff. All PDF files should be created for easy and fastest downloading.
- All software produced should be provided to SCAG with ANSI (American National Standards Institute) compliant documentation. See www.ansi.org.
- Accessibility for Disabled Users. SCAG strives to make all of its Web resources accessible to persons with disabilities in accordance with Federal law (Section 508). Development of new content must meet Level 1 requirements. See Web Accessibility section. For more information refer to www.w3.org/TR/WAI-WEBCONTENT/

3. Technical Standards

File Format:

- Text. Normal text on a Web page ensures the widest compatibility and fastest download. It also assists search engines in indexing information on the Web site. Be sure to allow sufficient white space for good readability. Avoid two or more column formatting. Avoid italicized fonts, as they are difficult to read.
- Multimedia. Unless necessary, keep audio and video files to a minimum. If used, subtitles and/or a text transcript describing what was attached must be provided to Web staff. See the Accessibility section for more information.

- Font size: Use Arial “10”
- A copy of the source code must be provided.
- Graphics. All graphics must be approved by the Graphics Department and conform to SCAG’s standard layout and design. Requests for new graphics should be coordinated directly with Carolyn Hart and meet these requirements:
 - Avoid excessive use of graphics and buttons. Keep amount of text and graphics to a minimum for easy viewing (less scrolling) and shorter download time. Break longer text documents into multiple pages.
 - If using images that serve a purpose on the page be sure to include a text description in the ALT attribute so that visually impaired users can read the images. Refer to Web Accessibility section.
 - Graphics must be in JPEG format, 72 dpi, RGB mode for photos.
 - All logos must be in EPS format and GIF.
 - Include all original higher resolution graphics and fonts that were used to create the Web page or layout.

Link to SCAG’s site

- All newly designed sites must include SCAG’s URL, www.scag.ca.gov on the main page for easy navigation. SCAG’s URL should be prominently displayed at the top of each page.
- Templates.
- SCAG standard layout and design templates must be used to maintain a consistent look and feel of the Web site.

4. Quality Assurance Testing

- Conduct testing against specifications. Ensure that new development works as planned. Fix bugs and limit changes here to bugs, unless absolutely important.
- Compatibility testing. Check to make sure that content is fully compatible with major Web browsers which include MS Internet Explorer 5+, Netscape 4, AOL 5 and Lynx (text based browser).

- Spell check. Make sure there are no spelling errors on the new content. Use Dreamweaver's built-in link check tool or purchase a third party service such as NetMechanic.
- Check for usability. Is the newly developed content understandable and intuitive?
- Accessibility check. Check the content against the Accessibility checklist provided. Do the changes meet the requirements outlined in the checklist?

5. Production Process

Final testing/posting

- Once the site has been approved, it will be transferred to SCAG's Web server. Web material will be posted/accepted only upon final review and approval by SCAG Web staff.
